

RODAPÉS

Os Rodapés são utilizados como alternativa a sistema de dutos embutidos, se tornando uma excelente opção na distribuição de fios e cabos em lugares onde não se permitem reformas, pois devido a sua praticidade de instalação não é necessário a interrupção das atividades. Pode ser aplicados em indústrias, escritórios, hotéis, bancos, hospitais.

Fabricados em aço pré zincado a fogo ou alumínio.

Acabamentos: Pintura eletrostática a pó, nas cores grafite, cinza médio, preto, branco e bege ou anodização no caso do alumínio.
